Honghub

Asia's first accelerator for one-person companies

The Macro Shift

We are entering the era where one person companies /micro teams become the default unit of innovation

What happened?

AI Collapses Costs

Production, design, marketing, coding & distribution costs **collapse** rapidly.

Individual Leverage

Individuals now have **company-level leverage** to scale themselves.

Era Shift

20th Century: Firms scaled workforces
21st Century: People scale themselves

Why this matters?

Investable Entities

Massive increase in # of **investable entities**

New Outcomes

New types of business **outcomes**

Missing Infra Layer

Infra layer for this shift is still missing.

Global Solo-Founder Wave

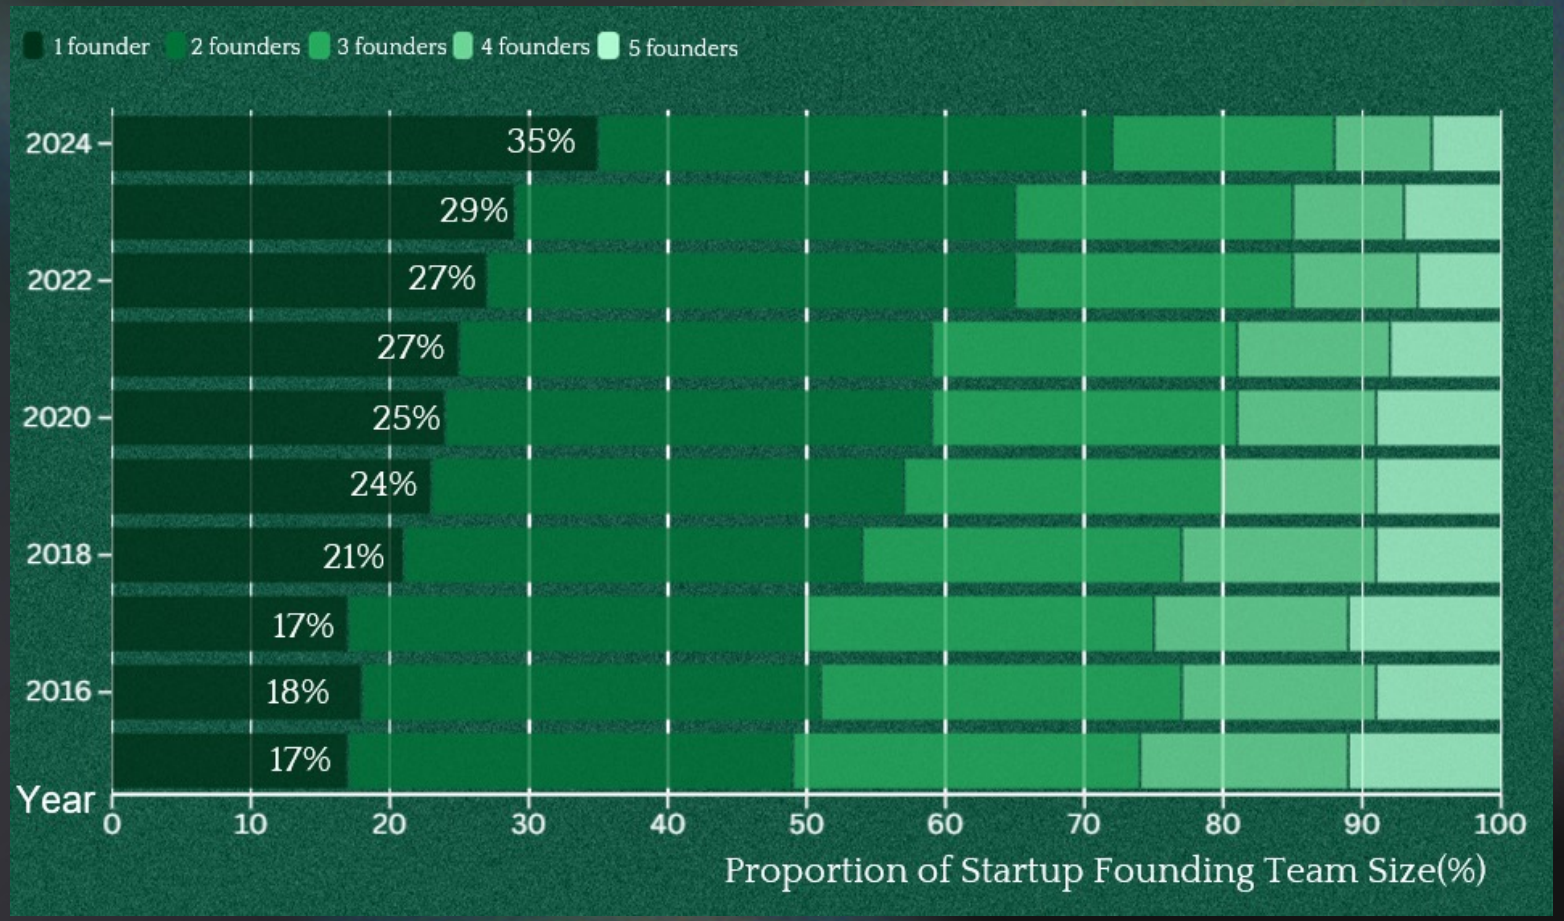

The rise of lean, AI-powered teams

88%

Teams of ≤3 founders

35%+

One-person startups

Why Solo Founders Still Struggle

Isolation

Building alone, without trusted peers, mentors, or advisors

Hard to access capital

Traditional PE / VCs overlook solo founders or pre-team deals.

Limited distribution

Difficult to reach users, incumbents, and cross-border markets.

Implication: AI solved building, but it didn't solve business.

Honghub: Asia's First Solo-Founder Accelerator

Honghub

- Asia's first solo-founder accelerator with first physical site in Hangzhou
- Flexible — Rolling admissions, no cohorts. Moving at AI speed.
- Founder-Friendly —$50k non-dilutive grant + compute
- Asset-light — We back the person, not just the product.

Our Core Team

Johnny Zou – Founder & CEO

13+ year experience in top Asian PE house + venture arm head.

Dr. Daiwei Tang – Venture Captain

Yale bio-statistics PhD, rich early-VC deal experience in AI, Healthcare & Hardware

William Wang – Community Lead

Ex-Fidelity, ex-MIT incubator community management experience.

Annabelle Zhou – Public Relation Lead

Communication & AI Governance 10 years across business media, AI GTM & Compliance;

Honghub solutions: Solo – Share – Soar

Solo – Product-first

Funding, space, compute, and marketing support so founders can focus on building.

Share – Structured collaboration

Share skills, customers, and resources within a curated network. Solo does not mean Alone

Soar – Capital growth

Accelerate market entry and scale with investors, strategists, and GTM partners.

Our Process & Early Results

Highly selective/competitive process

2,600+

Applications received

50+

Projects admitted to date

<3%

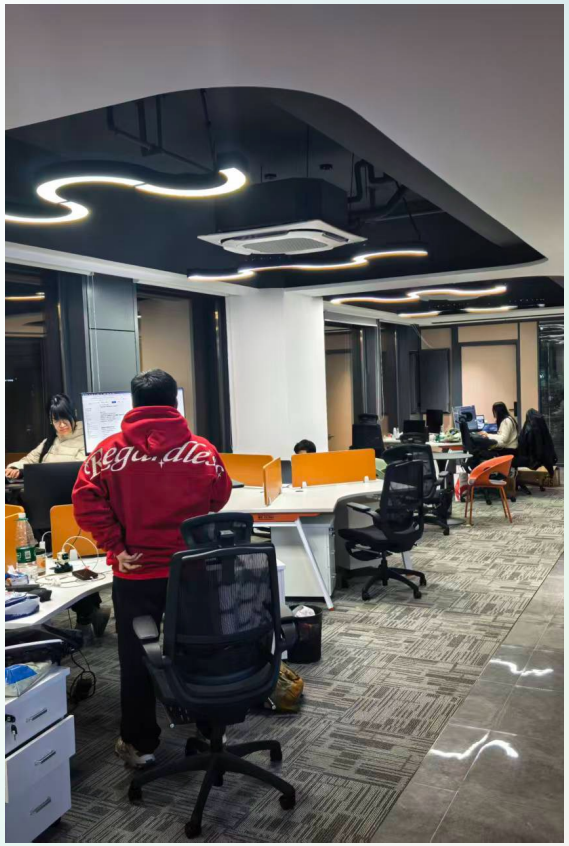

Acceptance rate

First-check founders

- Solo or mini scale teams.
- Early stage, but with a clear AI wedge and a concrete product goal.

Pivot founders

- Teams that raised before but are pivoting in terms of overall strategy
- Need capital, space, and community to rebuild into an AI-native pathway.

○ Workspace

○ Peer Feedback

○ Open Day

○ Public Workshop

Community as the Operating System

Peer density, public demos, enterprise dialogue, and founder-to-founder exchange turn AI output into real market learning.

Honghub Startup types

AI Agents & Multi-Agent Systems

AI Growth & Martech Tools

AI Infra, Developers & Intelligence Engines

Generative AI Creation Tools

Honghub OS

The operating system that gives solo founders company-scale capability.

Why Honghub OS

Advantage 1: Company-Scale Execution, One Person

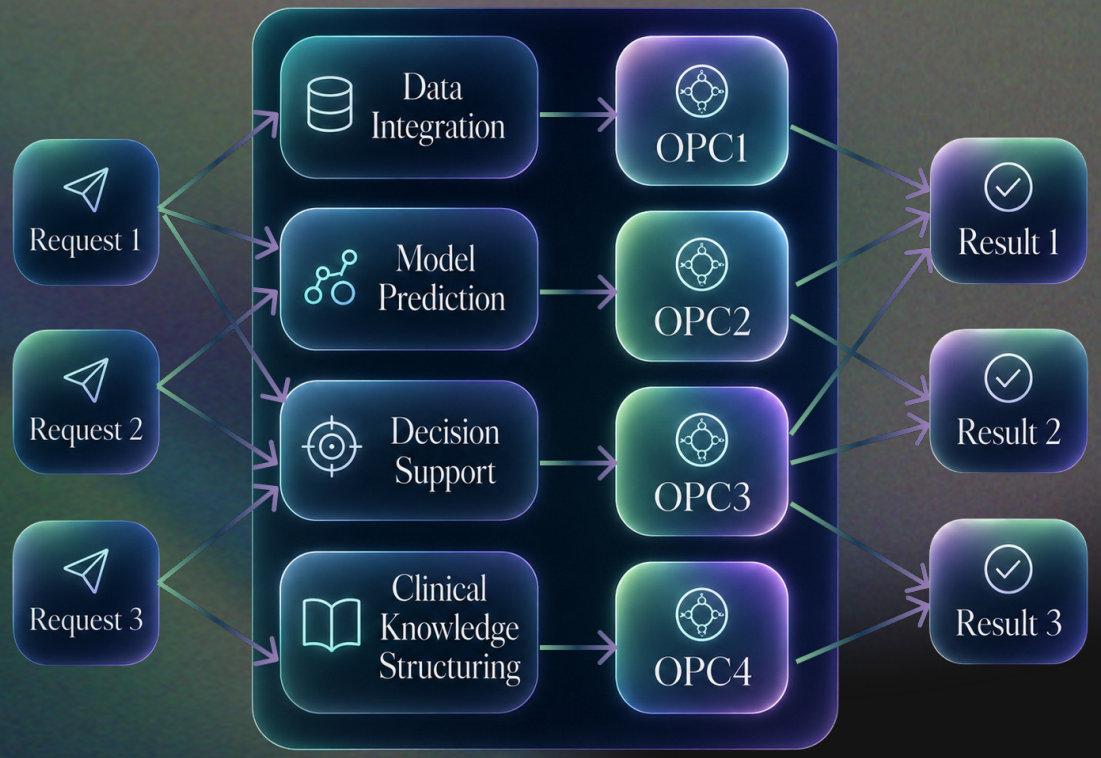

- Win deals with a trusted company identity
- Assemble on-demand teams of AI agents + specialists instantly
- End-to-end: deal → deliver → get paid

Advantage 2: Skill Marketplace — Symbiotic Ecosystem

- Specialists monetize skills as reusable service modules
- Founders access curated, plug-and-play capabilities

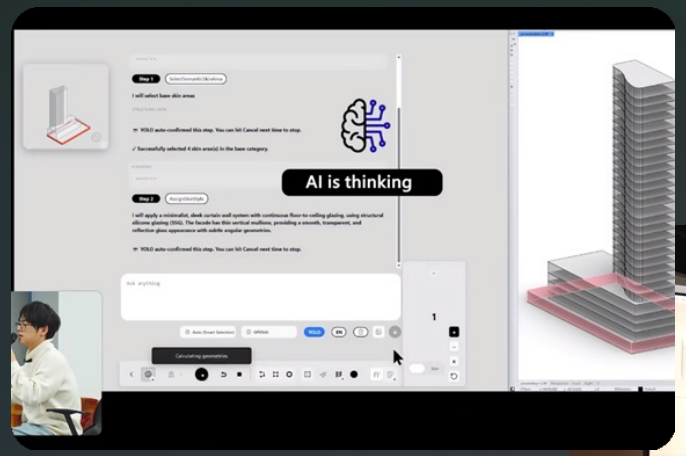

Advantage 3: Vendor-Neutral AI Middleware

- No lock-in — orchestrate any LLM, any tool
- Smart routing picks the best AI for each task

Case Study I : AI + Architecture -Frank Hu

Frank Hu is building AtomicArch, an AI-native CAD platform for early-stage architectural design—turning words into Reusable Digital Assets and cutting iteration time by 10–50×

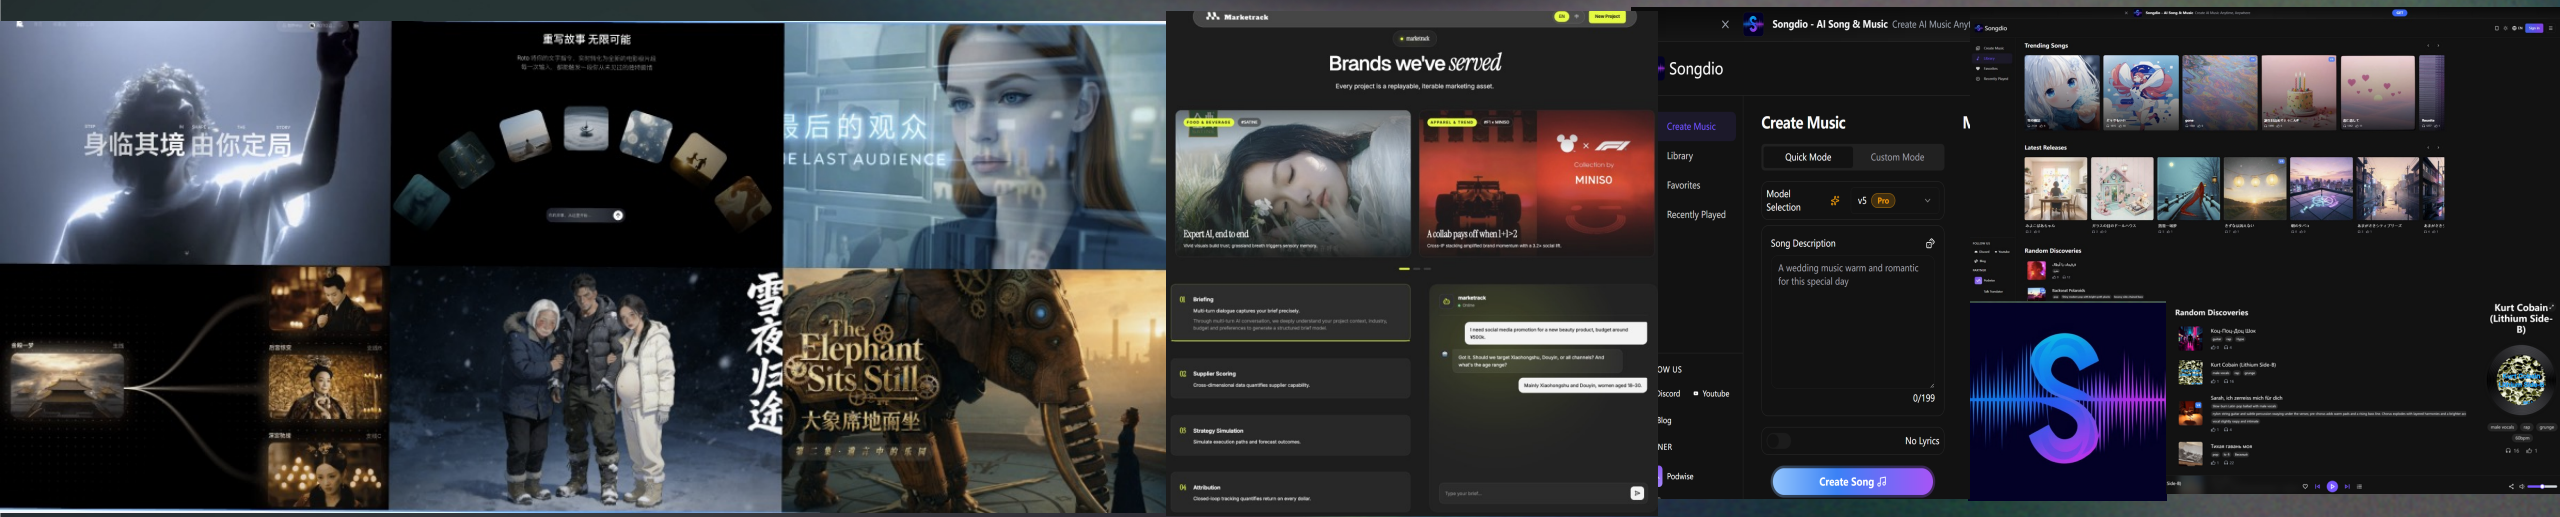

AtomicArch is an AI architectural CAD engine

Moving beyond simple image generation
It delivers iterative, engineering-grade 3D models

Founder's Project demo promoted across Honghub channels

Case Study 2: Songdio being acquired by FansAI

FansAI, a growth-stage startup, acquires Songdio — Honghub's OPC that turns a prompt, a hum, or a photo into fully produced songs and lip-synced music videos.

The deal completes FansAI's multimodal content stack, adds its most efficient revenue engine yet and closes a self-reinforcing data-and-distribution flywheel.

Where Culture Forms

First community-based OPC Center in Asia

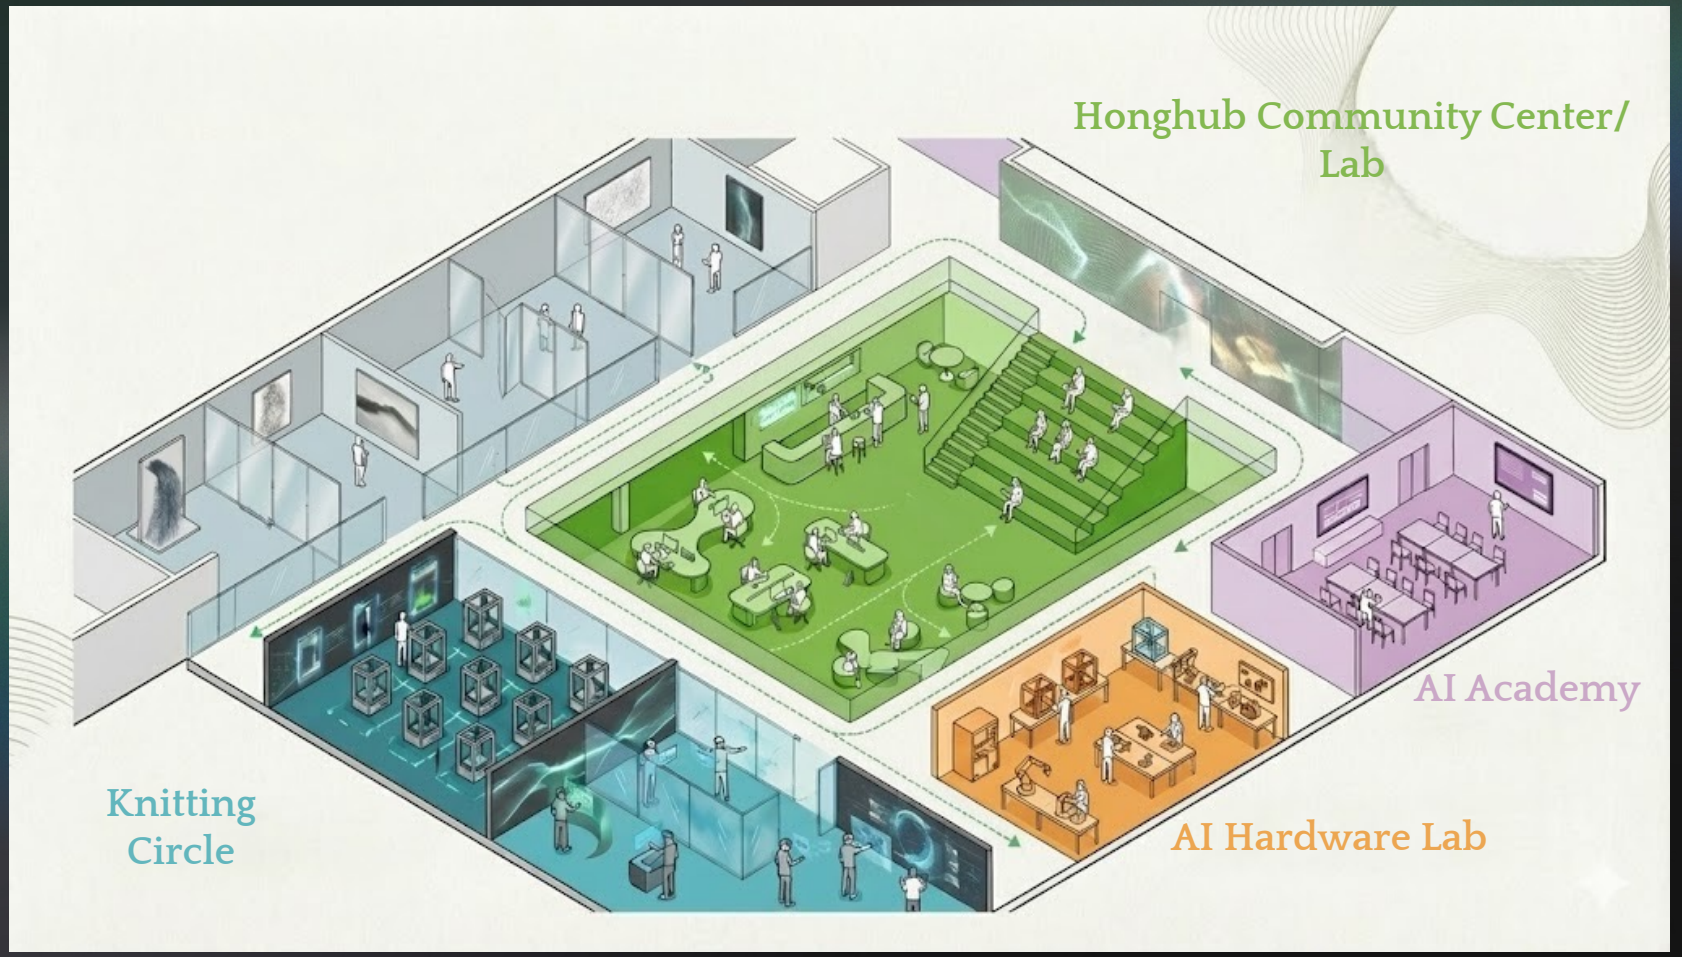

Where

Creators, Technologists, and Founders mix

Where

ideas turn into:

Collaborations
Content,
Startups, and
Cultural Influence

Why Honghub

All Proprietary Deals

First-check, under-the-radar, AI-centric deals from our accelerator — no "club deal".

Top-Tier Founders

<3% accelerator acceptance rate, then only the top 10-15% of incubatees earn our investment.

Active Ecosystem Partners

Investors tap talents to fast-track AI transformation — symbiotic, not passive.

Edge: Proprietary deals + Top-tier founders + Active partners = structural edge.

Fund Architecture and Targets

$30M

Fund Size

30%+

Target IRR

5x

Target MOIC

Fund Terms

- 2 yrs invest / 4 yrs harvest
- 1.5-2% management fee
- LP co-invest priority: up to 10x initial check, deal-by-deal

Portfolio Construction

- $200k-1.5M per deal
- 20-25 deals selected from a pool of solo founders
